Dear American Citizen,

The U.S. Embassy in Athens is participating in the pilot launch of a new **secure** Internet Based Registration Service, IBRS, created by the Bureau of Consular Affairs. American citizens traveling to or residing in countries abroad will use the new site to register information regarding their travel or residence in a country or countries abroad. The site will not store any of the registrant's information, but instead will pass it to a secure database located completely within the Department's firewalls. The new IBRS registration system is not only more secure than the previous method, but it also allows Consular staff to retrieve your important information quickly and with more precision.

Please visit the new IBRS site and re-register your current contact information at <https://travelregistration.state.gov/ibrs/>. We greatly appreciate your assistance.

Sincerely,
Nicholas Greanias
ACS Chief
